

AccuCare 9.8N Release Notes

Enhancements and Bug Fixes - Summary

REMINDER: It is recommended that you are operating the AccuCare Web system on Internet Explorer 11 or Chrome. Some features in AccuCare are not supported in older browsers, therefore may not function properly.

- System Session Log feature will now display all non-active licenses that have expired but are still in use. This will allow administrators to reset licenses for both active and non-active licenses being used.
- Workflow enhancements were made to Client Diagnosis for adding, editing, deleting, or reporting on diagnosis.
- Minor fixes to Client Diagnosis checklist for DSM-5 when displaying search results
- Modified report name for Active Diagnosis Count
- Minor fix to display Payer List Abbreviation in Accounting Code Setup
- Workflow improvements made in Admission/Discharge on handling Diagnosis Codes when adding or editing Episode or Level of Care
- Improved the View Criteria Report feature in Multi-Dimensional Assessment Report to display Diagnosis Criteria

- * Tolerance, as defined by either of the following: 1) A need for markedly increased amounts of the substance to achieve intoxication or desired effect. Or 2) A markedly diminished effect with continued use of the same amount of the substance.

F11.20	DSM-5 (ICD-10)	Opioid use disorder, Moderate	06/07/2017	Training T. Trainer
--------	----------------	-------------------------------	------------	---------------------

DSM-5 Criteria:

- * Substance often taken in larger amounts or over a longer period than was intended.
- * A great deal of time is spent in activities necessary to obtain the substance, use the substance, or recovery from its effects.

- Minor fix to how the Criteria History displays when using the View History check box in Client Diagnosis
- Minor alignment fixes to client search box displays in Scheduler and Appointment Check-in
- Minor fixes to how assigned agency and user fields (Case Management tab in Client Intake) handle edit mode
- Overall maintenance to technical functions when running reports in AccuCare
- Minor fixes to text boxes that handle phone numbers and extensions to improve display

- Minor improvements to the Top Ribbon on handling icons and link paths
- Improved Multi-Dimensional Assessment Question and Answer Report to display the criteria checklist used for the Client Diagnosis
- Modified how the system handles users without permission to Add/Edit Referral Sources with a notification window
- Minor fixes to technical functions in Client Payer Plan and Client Payer Info
- Minor technical improvements to how the system handles City, State and Zip Code properties
- Workflow improvements in System Questionnaires when saving a new questionnaire and returning to the main screen
- Minor fixes in Referral Source Manager to display list properly when saving a new referral source

The screenshot shows the 'Referral Source Manager' interface. On the left, the 'Referral Source' form includes fields for Name (ABC Inpatient), Agency (ABC Health and Treatment Network), Contact (Gail Thomas), Address 1 (13232 Maple Street), Address 2, City (Santa Clara), State (CA), Zip (34334-___), Phone 1 ((454) 445-4544), Phone 2, Email (gthomas@abchealthandtx.com), and Website. On the right, the 'Referral Attributes' section shows a list of selected attributes: Services - Inpatient, Services - Residential, Services - Family Support, and Services - Detox. Below this is a table with columns for Attribute Category, Attribute Detail, and Remove All. The table lists attributes such as Language (Chinese, Spanish, Vietnamese) and Services (Detox, Family Support, Inpatient, Residential). At the bottom of the window are buttons for 'New', 'Edit', 'Save', 'Cancel', 'Delete', 'Setup Attributes', 'Print', and 'Close'.

- Minor fixes in Decision Support Setup when adding a new Sublevel or Level of Care to ensure values are displayed immediately after saving
- Minor fix to Referred By list in Multi-Dimensional Assessment > Demographics tab to ensure the drop down list is displaying all of the referral sources properly
- Added Diagnosis Manager to the MOTS system questionnaire
- Added additional Frequency options (Every other Month and Every 8 weeks) to Question 14 on the Multi-Dimensional Assessment
- Minor fixes in Scheduler when handling edit/delete functions with recurring appointments that are long-running series (over a year)
- Minor fixes on how the system handles levels of care when deleting questionnaires
- Minor fixes to Diagnosis Manager Grid to display the coding system of the Diagnosis Codes
- Workflow improvements to Diagnosis Manager when updating status (Active vs. Inactive)
- Minor fix to how System Options handles Dimension headings for Multi-Dimensional Assessment when editing/saving a record

- Improvements in workflow for MOTS questionnaire, by adding current active diagnosis when creating a new questionnaire
- Enhanced the visual presentation of the Determination grid in the Multi-Dimensional Assessment Q&A report
